The presence of a drug on our drug formulary does not necessarily mean that your doctor will prescribe it for a medical condition. Your doctor will choose the appropriate therapy based upon medical necessity in their judgment.

If changes occur to the drug formulary or restrictions are added to a drug, and you are taking the drug affected by the change, you may be permitted to continue receiving that drug according to your drug

benefit, if your doctor deems it medically necessary.

## Formulary Changes

Kaiser Permanente updates the formulary on a monthly basis. Drugs are added or removed from the California Commercial Formulary during the year, these changes to the Formulary are based on new information or new drugs that become available.

### These formulary changes may include:

Change in drug or dosage form - changes in tier placement of a drug that results in an increase in cost sharing; and any changes of utilization management restrictions, including any additions of these restrictions.

Brand to generic - when a generic version of a brand-name drug on our formulary becomes available and meets our standards, it usually replaces the brand-name drug on our formulary.

Therapeutic change - prescription is changed from one medication to another because we've decided the new drug is a better option based on standards of safety, effectiveness, or affordability.

### **What is the Kaiser Permanente California Commercial Formulary?**

The California Commercial Formulary is a list of covered drugs chosen by a group of Kaiser Permanente doctors and pharmacists known as the Pharmacy and Therapeutics Committee. The Committee meets regularly to evaluate and select drugs that are safe and effective for our members. This Formulary meets the requirements outlined under state law, regulations, and guidance for commercial plans.

### **What drugs are covered?**

Kaiser Permanente covers brand, generic, and specialty drugs listed on the California Commercial Formulary as long as the drug is medically necessary, the prescription is filled at a Kaiser Permanente, or an affiliated pharmacy, and other coverage rules are followed.

If you are prescribed a drug on the California Commercial Formulary, that drug will be covered under the terms of your drug benefit.

### **What drugs are covered under the Medical vs. the Outpatient Prescription Drug Benefit?**

Administered drugs and products are medications and products that require administration or observation by medical personnel. These drugs and products are covered when prescribed by a Plan Provider, in accordance with our drug formulary guidelines, and they are administered to you in a Plan Facility or during home visits. Please refer to your *Evidence of Coverage* for further information.

### **Getting an exception to the formulary**

Drugs not listed on the formulary are called non-formulary drugs. When a Kaiser Permanente doctor, or an authorized referral doctor, determines that a non-formulary drug is medically appropriate and necessary, that drug will be covered under the terms of your benefits (if you have a prescription drug benefit). If you do not have a prescription drug benefit, you will be charged the full retail price for the drug.

You may consult with your Plan provider if an exception to the formulary is needed. You and your Plan provider are best able to determine your medication needs.

You may also contact Member Services, 24 hours a day, 7 days a week. If you wish to have a non-formulary drug that your doctor determines not to be medically necessary, you may file a grievance with Member Services by calling 1-800-464-4000.

If the Plan grants a member's standard exception request, the Plan will provide coverage of the non-formulary drug for the duration of the prescription, including refills. If the Plan grants an exception based on exigent (urgent) circumstances the Plan will provide coverage of the non-formulary drug for the duration of the exigency.

### **How do I ask for a coverage determination?**

You, your appointed representative, your Kaiser Permanente or affiliated doctor, or another prescriber can request a coverage determination.

A standard decision will be made within 72 hours. For urgent requests, an expedited (fast) decision will be made within 24 hours. For all exception requests, the timeframe begins when your doctor or other prescriber provides a supporting statement.

### **Are there any restrictions on the drugs covered on the Formulary?**

Some covered drugs may have additional requirements or limits on coverage, such as Quantity Limits. For certain drugs, Kaiser Permanente may limit the amount of the drug dispensed to a certain days' supply. For example, when there is a national shortage of a drug, we may limit the quantity of the drug dispensed. Additionally, current law limits the cost share (per prescription maximum) on oral anti-cancer drugs to no more than \$250 per 30-day supply.

### **Drugs and Supplies Related to the Treatment of Diabetes**

Kaiser Permanente covers medications, equipment, and supplies for the management and treatment of diabetes. The following items are included on the formulary and are covered under the terms of your drug benefit: insulin, ketone test strips and sugar or acetone test tablets or tapes for diabetes urine testing, pen delivery devices, disposable needles and syringes, and visual aids required to ensure proper dosage. Other equipment and supplies, such as insulin pumps, blood glucose monitors, blood glucose test strips, and lancets and lancet devices, are covered under the terms of your Durable Medical Equipment (DME) benefit. Please refer to your EOC for more information on coverage.

### **Preventive Drugs**

Preventive health drugs are select drugs required by law to be covered at no charge to members in select plans. Preventive health drugs are determined based upon evidence-based recommendations by the United States Preventive Services Task Force (USPSTF) with a rating of "A" or "B". You can find preventive health drugs on the formulary by locating drugs with "PREV" listed in column 3. Please refer to your EOC for more information on coverage.

### **Contraceptives**

Contraceptives are drugs or devices, such as diaphragms, sponges, or cervical caps, that help prevent pregnancy. Kaiser Permanente covers select FDA-approved contraceptive drugs, devices and other products, including prescribed over-the-counter items, at no charge to members in select plans.\* Please refer to your EOC for more information on coverage.

\*This does not apply to religious employers who have requested a health care service plan contract without coverage for FDA-approved contraceptive methods that are contrary to the religious employer's religious tenets.

### **What drugs are eligible to be mailed from the mail order pharmacy?**

Most drugs can be mailed from our mail order pharmacy. Some drugs (for example, drugs that

are extremely high cost or require special handling) may not be eligible for mailing. Drugs cannot be mailed outside the United States and we cannot mail drugs to all states.

You can order refills through our mail-order service online at [kp.org/refill](https://kp.org/refill) or by phone or mobile app. There is no extra charge for mail order. The appropriate cost share (according to your prescription drug benefit) will apply.

Your prescription drug benefit may have a lower cost share if you use the mail order pharmacy. Please refer to your *Evidence of Coverage* for complete details of your prescription drug benefit.

### **How do I use the formulary?**

The drugs are listed alphabetically under the column titled "Prescription Drug Name" by its brand or generic name under the therapeutic category and class to which it belongs. You can search this list using the brand or generic name of the drug by: Searching for the category or class to which the drug belongs and search for the name of the drug in alphabetical order or searching the alphabetical index of drugs by the name of the drug.

Listing a drug on the formulary does not guarantee that it will be prescribed by your doctor or prescriber.

### **Medical condition**

The formulary begins on page 11. The drugs in this formulary are grouped into categories depending on the type of medical conditions that they are used to treat. For example, drugs used to treat a heart condition are listed under the category, "Cardiovascular Drugs." If you know what your drug is used for, look for the category name in the list that begins on page 2. Then look under the category name for your drug.

### **Alphabetical listing**

If you are not sure what category to look under, you should look for your drug in the index that begins on page 112. The index provides an alphabetical list of all the drugs included in this document. Look in the index and find your drug. Next to your drug, you will see the page number where you can find coverage information. Turn to the page listed in the index and find the name of your drug in the first column of the list.

## Formulary Legend

### Column 1:

A drug is listed alphabetically by its brand and generic names in the therapeutic category and class to which it belongs.

The generic name of a brand name drug is included after the brand name in parenthesis and all bold and italicized lowercase letters.

If a generic equivalent for a brand name drug is available, and both the brand name and generic equivalents are covered, the generic drug will be listed separately from the brand name drug in all bold and italicized lowercase letters.

If a generic drug is marketed under a proprietary, trademark protected brand name, the brand name is listed in all CAPITAL letters after the generic name in parentheses and regular typeface with first letter of each word capitalized.

|-----------------------------------------|--------------------------------------------------------------------|
| Generic drug                            | <i>atorvastatin calcium tabs 20 mg</i>                             |
| Generic drug marketed with a brand name | [Ethinodiol Diacet & Eth Estrad] ZOVIA 1/35E (28) TABS 1-35 MG-MCG |
| Brand                                   | ADVAIR HFA AERO 230-21 MCG/ACT [ <i>fluticasone-salmeterol</i> ]   |

All dosage **forms** and **strengths** for a particular drug listed **may not be on the Formulary**. Some drugs have multiple dosage forms. In such cases, some dosages may be on the Formulary and others not.

Some of these drugs may be available only in a clinic setting and your applicable cost share may apply.

### Column 2:

The second column, "Drug Tier," will indicate what tier number the drug is in. Drugs on the California Commercial Marketplace Formulary are categorized as follows:

|               |                                                        |
|---------------|--------------------------------------------------------|
| <b>Tier 1</b> | Most generic drugs (includes certain brand-name drugs) |
| <b>Tier 2</b> | Most brand-name drugs (includes certain generic drugs) |
| <b>Tier 4</b> | High-cost brand-name or generic drugs                  |

Note: The tier in which a generic or brand-name drug is classified under may change at any time during the year.

### What are generic drugs?

A generic drug is the same drug as its brand name equivalent in dosage, safety, strength, how it is taken, quality, performance, and intended use. Generally, generic drugs cost less than brand-name drugs.

## What are brand-name drugs?

A brand name drug is a drug that is marketed under a proprietary, trademark protected name. Brand-name drugs are usually manufactured and sold by the pharmaceutical company that originally researched and developed the drug. When the patent on a brand-name drug expires, other pharmaceutical companies may manufacture and sell an FDA-approved generic version of the drug with the same active ingredient(s) at lower prices.

## What are Specialty drugs

Specialty drugs are very high-cost drugs on Tier 4 of the formulary.

## Cost Share for covered drugs

For information on cost sharing for each drug tier and any applicable dollar maximums in your health plan benefit package, refer to the “Cost Share Summary” of your EOC (*Evidence of Coverage*).

If Charges for Services are less than the Copayment described in your *EOC*, you will pay the lesser amount, subject to any applicable deductible or out-of-pocket maximum.

Note: The tier in which a generic or brand drug is classified under may change at any time during the year. Additionally, certain brand drugs may be covered at the cost share that applies for Tier 1 and certain generic drugs may be covered at the Tier 2 cost share. Tier 4 is for specialty drugs that are covered at a higher cost share.

## Column 3:

The third column of the chart will indicate any requirements or limits for that drug.
