What is the Kaiser Permanente, a State Employee Health Benefit Formulary?

A formulary is a list of drugs determined to be safe and effective for our members by our Pharmacy and Therapeutics committee. Use of the formulary enables Kaiser Permanente to provide optimal care to you and your family at reasonable costs. Kaiser Permanente continually updates the formulary throughout the year based on new medical evidence, considering the recommendations of appropriate physician experts. Our physicians and pharmacists work closely together to ensure that our formulary meets your needs.

Does the formulary ever change?

Yes, Kaiser Permanente periodically updates the formulary based on new medical evidence, considering the recommendations of appropriate physician experts and notifies our doctors, pharmacists, and other clinicians about any changes. If a change in the formulary affects any of your prescriptions, your doctor or pharmacist will let you know.

The enclosed formulary is effective as of **January 1, 2026** and represents the most commonly prescribed medications.

How do I use the Formulary?

There is an easy way to find your drug within the formulary:

To search for a specific medication or condition, press the 'CTRL' key and the 'F' key on your keyboard at the same time. In the search window that pops up, enter the text you want to search for and press 'Enter.' Press 'Enter' again to move to the next result.

Medical Condition

The drugs on this formulary are grouped into categories depending on the type of medical

condition that they are used to treat. For example, drugs used to treat a heart condition are listed under the category, "Cardiovascular Drugs." If you know what your drug is used for, simply look for the category name in the list. Then look under the category name for your drug.

Alphabetical Listing

If you are not sure what category to look under, you can look for the drug in the Index. The Index provides an alphabetical list of all the drugs included in this document. Both Preferred Brand-name drugs and generic drugs are listed in the Index. Look in the Index and find your drug. Next to the drug, you will see the page number where you can find coverage information. Go to the page listed in the Index and find the name of your drug on the list.

What are generic drugs?

Kaiser Permanente covers both Preferred Brand-name drugs and generic drugs.

Generic drugs are produced and sold under their chemical names after the patent of the Preferred Brand name drug expires. Although the price is lower, the quality and effectiveness of generic drugs is the same as Preferred Brand name drugs. The Federal Food and Drug Administration (FDA) requires that generic drugs contain the same active ingredients in the same amount as the Preferred Brand name drug. Generic drugs are listed in lower-case italics (e.g., *amoxicillin*) within the formulary. Preferred Brand-name drugs are capitalized within the formulary (e.g., FLOVENT).

What are Preferred Brand name drugs?

Preferred Brand name drugs are drugs that are produced and sold under the original manufacturer's name.

What are Non- Preferred Brand drugs?

Non-Preferred Brand drugs are drugs that are not included on the plan's list of preferred prescription drugs.

Because all drug product strengths and package sizes of a formulary drug will be included in your plan's benefits, just note the drug cost share coverage amount will be based on the specific tier of the formulary, check with your Kaiser Permanente pharmacist for clarification, if needed.

How much will I pay for Covered Drugs?

What you pay for covered drugs is determined by the outpatient prescription drug benefit outlined in your Evidence of Coverage. Kaiser Permanente, the State Employee Health Benefit plan has a three-tier open formulary benefit.

Open formulary benefits have a generic cost sharing requirement. This means that if you choose to fill a Preferred Brand name drug when a generic is available, then in addition to your standard cost share, you will also pay the difference in cost between the Preferred Brand name and generic drug.

Generics drugs are those covered at the lowest cost share defined as Tier 1 coverage amount. Preferred Brand drugs are those Preferred Brands which will be covered at your preferred Brand cost share defined as Tier 2 coverage amount. Non-preferred Brands drugs are covered at the non-preferred cost share defined as Tier 3 coverage amount.

Coverage for prescription drugs is limited to drugs for which a prescription is required by law and those that are listed on the Kaiser Permanente, the State Employee Health

Benefit drug formulary. Certain diabetic supplies do not require a prescription but must still be listed in our formulary in order to be covered under the benefit.

Each prescription refill is provided on the same basis as the original prescription. Cost shares are applied on a per prescription basis, for up to the lesser of the dispensing amount listed in the "Schedule of Benefits" or the standard prescription amount.

The standard prescription amount for the following items is:

- Migraine medications — the smallest package size commercially available
- Ophthalmic and otic medications — the smallest package size commercially available
- Oral and nasal inhalers — the smallest standard package size

Are there any other restrictions on coverage?

Some covered drugs may have additional requirements or limits on coverage. These requirements and limits may include:

- Quantity Limits (QL): For certain drugs, Kaiser Permanente limits the amount of the drug that will be covered.
- Age Restriction (AGE): For certain drugs, Kaiser Permanente limits coverage based on a designated age.
- Prior Authorization (PA): For certain drugs, Kaiser Permanente requires review and authorization prior to dispensing. Your Provider must obtain this review and authorization. The list of prescription drugs requiring review and authorization is

subject to periodic review and modification by our Pharmacy and Therapeutics Committee.

- Step Therapy (ST): For certain drugs, Kaiser Permanente requires the use of similar, alternative medications prior to coverage.

You can find out if the drug has any additional requirements or limits by looking in the Restrictions Column on the formulary list.

What if my drug is not on the Formulary?

Because all drug product strengths and package sizes of a formulary drug may not be included on the formulary, check with your

Kaiser Permanente pharmacist for clarification, if needed.

For more information

For more detailed information about your Kaiser Permanente, prescription drug coverage, please review your *Evidence of Coverage* and other plan materials.

If you have questions about Kaiser Permanente, please call Member Services at **1-833-642-5973 or 770-291-4430**, Monday through Friday 7:00 a.m. to 7 p.m. TTY/TDD users should call **1-800-255-0056**.
