

Criteria-Based Consultation Prescribing Program

CRITERIA FOR DRUG COVERAGE

Methylphenidate (Jornay PM)

Notes:

- ^ Adequate trial of a long-acting agent is further defined as wearing off that is not resolved by increasing the dose, AND adding a short-acting agent OR increasing frequency to twice daily OR clinically significant side effects related to the dosage form that cannot be resolved by adjusting the dose or timing.
- **Adequate trial of a short acting agent is further defined as wearing off that is not resolved by increasing the dose and the frequency to a minimum of twice daily OR clinically significant side effects related to the short-acting dosage form that cannot be resolved by adjusting the dose or timing.
- * Intolerance excludes adverse drug reactions that are expected, mild in nature, resolve with continued treatment, and do not require medication discontinuation

Initiation (new start) criteria: Non-formulary **methylphenidate (Jornay PM)** will be covered on the prescription drug benefit when the following criteria are met:

- Diagnosis of Attention Deficit and Hyperactivity Disorder (ADHD)
- Patient has failed an adequate trial[^] of a methylphenidate ER (Concerta, Metadate CD, Ritalin LA) (must have at least partial response), with a short-acting agent, unless allergy to an inactive ingredient
- Patient has failed an adequate trial[^] of dexamethylphenidate ER (Focalin XR), with a short-acting agent, unless allergy to an inactive ingredient
- Patient has failed an adequate trial [^] of a long-acting amphetamine product (Adderall XR, etc), with a short-acting agent, unless allergy to an inactive ingredient

Criteria for *current Kaiser Permanente members already taking the medication who have not been reviewed previously*: Non-formulary **methylphenidate (Jornay PM)** will be covered on the prescription drug benefit when the following criteria are met:

- Diagnosis of Attention Deficit and Hyperactivity Disorder (ADHD)
- Patient has failed an adequate trial[^] of a methylphenidate ER (Concerta, Metadate CD, Ritalin LA) (must have at least partial response), with a short-acting agent, unless allergy to an inactive ingredient
- Patient has failed an adequate trial[^] of dexamethylphenidate ER (Focalin XR), with a short-acting agent, unless allergy to an inactive ingredient
- Patient has failed an adequate trial [^] of a long-acting amphetamine product (Adderall XR, etc), with a short-acting agent, unless allergy to an inactive ingredient

Criteria-Based Consultation Prescribing Program

CRITERIA FOR DRUG COVERAGE

Methylphenidate (Jornay PM)

Criteria for new members entering Kaiser Permanente already taking the medication who have not been reviewed previously: Non-formulary **methylphenidate (Jornay PM)** will be covered on the prescription drug benefit when the following criteria are met:

- Patient has a diagnosis of Attention Deficit and Hyperactivity Disorder (ADHD)
- Patient has failed an adequate trial[^] of a methylphenidate ER (Concerta, Metadate CD, Ritalin LA) (must have at least partial response), with a short-acting agent, unless allergy to an inactive ingredient
- Patient has failed an adequate trial[^] of dexamethylphenidate ER (Focalin XR), with a short-acting agent, unless allergy to an inactive ingredient

- OR -

- Patient has a diagnosis of Attention Deficit and Hyperactivity Disorder (ADHD) and patient is age 6 to 20 years old and stable on medication
