

## **DUPILUMAB**

| Generic   | Brand    | HICL  | GCN | Medi-Span    | Exception/Other |
|-----------|----------|-------|-----|--------------|-----------------|
| DUPILUMAB | DUPIXENT | 44180 |     | GPI-10       |                 |
|           |          |       |     | (9027302000) |                 |

#### **GUIDELINES FOR USE**

## **INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)**

- 1. Does the patient have a diagnosis of moderate to severe atopic dermatitis and meet **ALL** of the following criteria?
  - The patient is 6 months of age or older
  - Therapy is prescribed by or in consultation with a dermatologist, allergist, or immunologist
  - The patient has TWO of the following: intractable pruritus, cracking and oozing/bleeding of affected skin, impaired activities of daily living
  - Dupixent will NOT be used concurrently with other systemic biologics (e.g., Adbry [tralokinumab-ldrm]) or any JAK inhibitors (e.g., Rinvoq [upadacitinib], topical Opzelura [ruxolitinib], Cibinqo [abrocitinib]) for the treatment of atopic dermatitis

If yes, continue to #2. If no, continue to #4.

- 2. Does the patient meet **ONE** of the following criteria?
  - The patient was previously stable on another biologic (e.g., Adbry [tralokinumab-ldrm]) and switching to the requested drug
  - The patient has atopic dermatitis involving at least 10% of body surface area (BSA)
  - The patient's atopic dermatitis affecting the face, head, neck, hands, feet, groin, or intertriginous areas

If yes, continue to #3. If no, do not approve.

**DENIAL TEXT:** See the initial denial text at the end of the guideline.

#### CONTINUED ON NEXT PAGE

Revised: 5/23/2023 Page 1 of 13

## **DUPILUMAB**

## **INITIAL CRITERIA (CONTINUED)**

- 3. Does the patient have a trial of or contraindication to **ONE** of the following?
  - Topical corticosteroid (e.g., hydrocortisone, clobetasol, halobetasol propionate)
  - Topical calcineurin inhibitor [e.g., Elidel (pimecrolimus), Protopic (tacrolimus)]
  - Topical PDE-4 inhibitor [e.g., Eucrisa (crisaborole)]
  - Topical JAK inhibitor [e.g., Opzelura (ruxolitinib)]
  - Phototherapy

If yes, enter TWO approvals by GPID or GPI-14 for the requested strength for a total of 6 months as follows:

- FIRST APPROVAL: Approve with an end date of 1 month as follows:
  - o 200mg/1.14mL: #4.56mL.
  - o 300mg/2mL: #8mL.
- SECOND APPROVAL: Approve for 5 months as follows (enter a start date of 1 week after the end of the first approval):
  - o 200mg/1.14mL: #2.28mL per 28 days.
  - 300mg/2mL: #4mL per 28 days.

If no, do not approve.

**DENIAL TEXT:** See the initial denial text at the end of the guideline.

- 4. Does the patient have a diagnosis of moderate to severe asthma with an eosinophilic phenotype **AND** meet the following criterion?
  - The patient has a documented blood eosinophil level of 150 to 1500 cells/mcL within the past 12 months

If yes, continue to #6. If no, continue to #5.

5. Does the patient have a diagnosis of moderate to severe oral corticosteroid-dependent asthma?

If yes, continue to #6. If no, continue to #9.

#### **CONTINUED ON NEXT PAGE**

Revised: 5/23/2023 Page 2 of 13

## **DUPILUMAB**

#### **INITIAL CRITERIA (CONTINUED)**

- 6. Does the patient meet **ALL** of the following criteria?
  - The patient is 6 years of age or older
  - Therapy is prescribed by or in consultation with a physician specializing in pulmonary or allergy medicine
  - The patient is on concurrent treatment with medium, high-dose, or maximally tolerated inhaled corticosteroid (ICS) [e.g., triamcinolone acetonide, beclomethasone, mometasone, budesonide, etc.] AND at least one other maintenance medication (e.g., long-acting inhaled beta2-agonist [e.g., salmeterol, formoterol, etc.], long-acting muscarinic antagonist [e.g., aclidinium bromide, ipratropium, tiotropium, umeclidinium, etc.], a leukotriene receptor antagonist [e.g., montelukast, zafirlukast, zileuton, etc.], theophylline)
  - Dupixent will NOT be used concurrently with Xolair (omalizumab) or an anti-IL5 biologic (e.g., Nucala [mepolizumab], Cinqair [reslizumab], Fasenra [benralizumab]) when these are used for the treatment of asthma

If yes, continue to #7. If no, do not approve.

**DENIAL TEXT:** See the initial denial text at the end of the guideline.

- 7. Does the patient meet **ONE** of the following criteria?
  - The patient experienced at least ONE asthma exacerbation requiring systemic corticosteroid burst lasting at least 3 days within the past 12 months OR at least ONE serious exacerbation requiring hospitalization or emergency room visit within the past 12 months
  - The patient has poor symptom control despite current therapy as evidenced by at least THREE of the following within the past 4 weeks:
    - Daytime asthma symptoms more than twice per week
    - Any night waking due to asthma
    - Short-acting inhaled beta2-agonist (SABA; e.g., albuterol) reliever for symptoms more than twice per week
    - Any activity limitation due to asthma

If yes, continue to #8. If no, do not approve.

**DENIAL TEXT:** See the initial denial text at the end of the guideline.

## **CONTINUED ON NEXT PAGE**

Revised: 5/23/2023 Page 3 of 13

## **DUPILUMAB**

## **INITIAL CRITERIA (CONTINUED)**

8. Is the request for the 100 mg/0.67mL strength?

If yes, approve 100 mg/0.67mL by GPID or GPI-14 for 4 months with a quantity limit of #1.34mL per 28 days.

If no, enter TWO approvals by GPID or GPI-14 for the requested strength for a total of 4 months as follows:

- FIRST APPROVAL: Approve with an end date of 1 month as follows:
- o 200mg/1.14mL: #4.56mL.
  - o 300mg/2mL: #8mL.
- SECOND APPROVAL: Approve for 3 months as follows (enter a start date of 1 week after the end of the first approval):
  - o 200mg/1.14mL: #2.28mL per 28 days.
  - 300mg/2mL: #4mL per 28 days.
- 9. Does the patient have a diagnosis of chronic rhinosinusitis with nasal polyposis (CRSwNP) and meet **ALL** of the following criteria?
  - The patient is 18 years of age or older
  - Therapy is prescribed by or in consultation with an otolaryngologist, allergist, or immunologist
  - There is documentation of evidence of nasal polyps by direct examination, endoscopy, or sinus CT scan
  - The patient has inadequately controlled disease as determined by ONE of the following:
    - Use of systemic steroids in the past 2 years
    - Endoscopic sinus surgery
  - Dupixent will be used as add-on maintenance treatment (i.e., in conjunction with maintenance intranasal steroids)
  - The patient had a previous 90-day trial of ONE intranasal corticosteroid

If yes, approve 300mg/2mL for 6 months by GPID or GPI-14 with a quantity limit of #4mL per 28 days.

If no, continue to #10.

- 10. Does the patient have a diagnosis of eosinophilic esophagitis (EoE) and meet **ONE** of the following criteria?
  - The patient is 18 years of age or older
  - The patient is 12 to 17 years of age AND weighs at least 40kg

If yes, continue to #11.

If no, continue to #12.

#### **CONTINUED ON NEXT PAGE**

Revised: 5/23/2023 Page 4 of 13

## **DUPILUMAB**

## **INITIAL CRITERIA (CONTINUED)**

- 11. Does the patient meet **ALL** of the following criteria?
  - Therapy is prescribed by or in consultation with a gastroenterologist, allergist, or immunologist
  - The patient's diagnosis is confirmed by an esophagogastroduodenoscopy (EGD) with biopsy
  - The patient had a trial of or contraindication to dietary therapy
  - The patient had a trial of or contraindication to a proton pump inhibitor (e.g., omeprazole, lansoprazole, pantoprazole)

If yes, approve 300mg/2mL for 6 months by GPID or GPI-14 with a quantity limit of #8mL per 28 days.

If no, do not approve.

**DENIAL TEXT:** See the initial denial text at the end of the guideline.

- 12. Does the patient have a diagnosis of prurigo nodularis (PN) and meet **ALL** of the following criteria?
  - The patient is 18 years of age or older
  - Therapy is prescribed by or in consultation with a dermatologist, immunologist or allergist
  - The patient has chronic pruritis (i.e., itch lasting longer than 6 weeks), presence of multiple pruriginous lesions (localized or general), and a history or sign of a prolonged scratching behavior
  - The patient had a trial of or contraindication to ONE of the following: topical capsaicin, topical ketamine/amitriptyline/lidocaine, gabapentinoids (e.g., gabapentin, pregabalin), antidepressants (SNRI, SSRI, TCA), k-/mu-opioid receptor antagonists (e.g., naltrexone, butorphanol), thalidomide, topical corticosteroids, topical calcineurin inhibitors, topical calcipotriol, intralesional corticosteroids, phototherapy, methotrexate, cyclosporine, azathioprine

If yes, enter TWO approvals by GPID or GPI-14 for the requested strength for a total of 6 months as follows:

- FIRST APPROVAL: Approve with an end date of 1 month as follows:
  - o 300mg/2mL: #8mL
- SECOND APPROVAL: Approve for 5 months as follows (enter a start date of 1 week after the end of the first approval):
  - 300mg/2mL: #4mL per 28 days.

If no, do not approve.

**DENIAL TEXT:** See the initial denial text at the end of the guideline.

## **DUPILUMAB**

#### **INITIAL CRITERIA (CONTINUED)**

INITIAL DENIAL TEXT: \*Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **DUPILUMAB (Dupixent)** requires the following rule(s) be met for approval:

- A. You have ONE of the following diagnoses:
  - 1. Moderate to severe atopic dermatitis (a type of skin condition)
  - 2. Moderate to severe asthma
  - 3. Chronic rhinosinusitis with nasal polyposis (a type of long-term nasal condition)
  - 4. Eosinophilic esophagitis (a type of immune system disorder)
  - 5. Prurigo nodularis (a type of skin condition)

## B. If you have moderate to severe atopic dermatitis, approval also requires:

- 1. You are 6 months of age or older
- 2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor), allergist (a type of allergy doctor), or immunologist (a type of immune system doctor)
- 3. You have TWO of the following: intractable pruritus (severe itching), cracking and oozing/bleeding of affected skin, impaired activities of daily living
- 4. You had a trial of or contraindication (harmful for) to ONE of the following: topical corticosteroid (such as hydrocortisone, clobetasol, halobetasol propionate), topical calcineurin inhibitor [Elidel (pimecrolimus), Protopic (tacrolimus)], topical PDE-4 inhibitor [Eucrisa (crisaborole)], topical JAK inhibitor [Opzelura (ruxolitinib)], phototherapy (light therapy)
- 5. You will NOT use Dupixent concurrently (at the same time) with other systemic biologics (such as Adbry [tralokinumab-ldrm]) or any JAK inhibitors (such as Rinvoq [upadacitinib], topical Opzelura [ruxolitinib], Cibinqo [abrocitinib]) for the treatment of atopic dermatitis
- 6. You meet ONE of the following:
  - a. You were previously stable on another biologic (such as Adbry [tralokinumab-ldrm]) and switching to the requested drug
  - b. You have atopic dermatitis involving at least 10 percent of body surface area (BSA)
  - c. Your atopic dermatitis is affecting the face, head, neck, hands, feet, groin, or intertriginous areas (between skin folds)

(Initial denial text continued on next page)

Revised: 5/23/2023 Page 6 of 13

## **DUPILUMAB**

## **INITIAL CRITERIA (CONTINUED)**

- C. If you have moderate to severe asthma, approval also requires:
  - 1. You are 6 years of age or older
  - 2. Therapy is prescribed by or in consultation with a doctor specializing in pulmonary (lung/breathing) or allergy medicine
  - 3. You have an eosinophilic phenotype asthma (type of adult inflammatory asthma) with a documented blood eosinophil level of 150 to 1500 cells/mcL within the past 12 months OR you have oral corticosteroid-dependent asthma
  - 4. You are being treated at the same time with medium, high-dose, or maximally tolerated inhaled corticosteroid [such as triamcinolone acetonide, beclomethasone, mometasone, budesonide] AND at least one other maintenance medication such as long-acting inhaled beta2-agonist (such as salmeterol, formoterol), long-acting muscarinic antagonist (such as aclidinium bromide, ipratropium, umeclidinium, tiotropium), a leukotriene receptor antagonist (such as montelukast, zafirlukast, zileuton), or theophylline
  - 5. You will NOT use Dupixent concurrently (at the same time) with Xolair (omalizumab) or an anti-IL5 biologic (such as Nucala [mepolizumab], Cinqair [reslizumab], Fasenra [benralizumab]) when these are used for the treatment of asthma
  - 6. You meet ONE of the following:
    - a. You have experienced at least ONE asthma exacerbation (worsening of symptoms) requiring systemic corticosteroid burst lasting at least 3 days within the past 12 months OR at least ONE serious exacerbation requiring hospitalization or emergency room (ER) visit within the past 12 months
    - b. You have poor symptom control despite current therapy as evidenced by at least THREE of the following within the past 4 weeks:
      - i. Daytime asthma symptoms more than twice per week
      - ii. Any night waking due to asthma
      - iii. Use of short-acting inhaled beta2-agonist reliever (such as albuterol) for symptoms more than twice per week
      - iv. Any activity limitation due to asthma

(Initial denial text continued on next page)

## **DUPILUMAB**

#### **INITIAL CRITERIA (CONTINUED)**

## D. If you have chronic rhinosinusitis with nasal polyposis, approval also requires:

- 1. You are 18 years of age or older
- 2. Therapy is prescribed by or in consultation with an otolaryngologist (ear, nose, throat doctor), allergist (a type of allergy doctor), or immunologist (a type of immune system doctor)
- 3. There is documentation of evidence of nasal polyps (non-cancerous growths) by direct examination, endoscopy (using a small camera) or sinus CT scan
- 4. You have inadequately controlled disease as determined by ONE of the following:
  - a. Use of systemic steroids in the past 2 years
  - b. Endoscopic sinus surgery (using a small camera to help in surgery)
- 5. Dupixent will be used as add-on maintenance treatment (in conjunction with maintenance intranasal steroids)
- 6. You had a previous 90-day trial of ONE intranasal corticosteroid

## E. If you have eosinophilic esophagitis, approval also requires:

- 1. You meet ONE of the following:
  - a. You are 18 years of age or older
  - b. You are 12 to 17 years of age AND weigh at least 40 kilograms
- Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions), allergist (a type of allergy doctor), or immunologist (a type of immune system doctor)
- 3. Your diagnosis is confirmed by an esophagogastroduodenoscopy (EGD) with biopsy (a test that looks at the lining of your food pipe, stomach, and small intestine)
- 4. You had a trial of or contraindication (harmful for) to dietary therapy
- 5. You had a trial of or contraindication (harmful for) to a proton pump inhibitor (such as omeprazole, lansoprazole, pantoprazole)

## F. If you have prurigo nodularis, approval also requires:

- 1. You are 18 years of age or older
- 2. Therapy is prescribed by or in consultation with a dermatologist (skin doctor), immunologist (type of immune system doctor), or allergist
- 3. You have chronic pruritis (itch lasting longer than 6 weeks), presence of multiple pruriginous lesions (wounds), and a history or sign of a prolonged scratching behavior
- 4. You had a trial of or contraindication (harmful for) to ONE of the following: topical capsaicin, topical ketamine/amitriptyline/lidocaine, gabapentinoids (e.g., gabapentin, pregabalin), antidepressants (serotonin-norepinephrine reuptake inhibitor [SNRI], selective serotonin reuptake inhibitor [SSRI], tricyclic antidepressant [TCA]), k-/mu-opioid receptor antagonists (e.g., naltrexone, butorphanol), thalidomide, topical corticosteroids, topical calcineurin inhibitors, topical calcipotriol, intralesional corticosteroids, phototherapy, methotrexate, cyclosporine, azathioprine

(Initial denial text continued on next page)

## **DUPILUMAB**

## **INITIAL CRITERIA (CONTINUED)**

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

## **RENEWAL CRITERIA**

- 1. Does the patient have a diagnosis of moderate to severe atopic dermatitis and meet **ALL** of the following criteria?
  - The patient has shown improvement while on therapy
  - Dupixent will NOT be used concurrently with other systemic biologics (e.g., Adbry [tralokinumab-ldrm]) or any JAK inhibitors (e.g., Rinvoq [upadacitinib], topical Opzelura [ruxolitinib], Cibinqo [abrocitinib]) for the treatment of atopic dermatitis

If yes, approve for 12 months by GPID or GPI-14 for the requested strength as follows:

- 200mg/1.14mL: #2.28mL per 28 days.
- 300mg/2mL: #4mL per 28 days.

If no, continue to #2.

Revised: 5/23/2023 Page 9 of 13

## **DUPILUMAB**

## **RENEWAL CRITERIA (CONTINUED)**

- 2. Does the patient have a diagnosis of moderate to severe asthma and meet **ALL** of the following criteria?
  - The patient continues to use an inhaled corticosteroid (ICS) AND at least one other
    maintenance medication (e.g., long-acting inhaled beta2-agonist [such as salmeterol,
    formoterol, etc.], long-acting muscarinic antagonist [such as aclidinium bromide, ipratropium,
    tiotropium, umeclidinium, etc.], a leukotriene receptor antagonist [such as montelukast,
    zafirlukast, zileuton, etc.], theophylline)
  - The patient has shown a clinical response as evidenced by ONE of the following:
    - o Reduction in asthma exacerbation from baseline
    - Decreased utilization of rescue medications
    - Increase in percent predicted FEV1 from pretreatment baseline
    - Reduction in severity or frequency of asthma-related symptoms (e.g., wheezing, shortness of breath, coughing, etc.)
  - Dupixent will NOT be used concurrently with Xolair (omalizumab) or an anti-IL5 biologic (e.g., Nucala [mepolizumab], Cinqair [reslizumab], Fasenra [benralizumab]) when these are used for the treatment of asthma

If yes, approve for 12 months by GPID or GPI-14 for the requested strength as follows:

- 100mg/0.67mL: #1.34mL per 28 days.
- 200mg/1.14mL: #2.28mL per 28 days.
- 300mg/2mL: #4mL per 28 days.

If no, continue to #3.

- 3. Does the patient have a diagnosis of chronic rhinosinusitis with nasal polyposis (CRSwNP) **AND** meet the following criterion?
  - The patient has shown clinical benefit compared to baseline (e.g., improvements in nasal congestion, sense of smell or size of polyps)

If yes, approve 300mg/2mL for 12 months by GPID or GPI-14 with a quantity limit of #4mL per 28 days.

If no, continue to #4.

## **CONTINUED ON NEXT PAGE**

Revised: 5/23/2023 Page 10 of 13

## **DUPILUMAB**

## **RENEWAL CRITERIA (CONTINUED)**

- 4. Does the patient have a diagnosis of eosinophilic esophagitis (EoE) **AND** meet the following criterion?
  - The patient has shown improvement while on therapy (e.g., symptom improvement or achieving histological remission defined as peak esophageal intraepithelial eosinophil count of less than or equal to 6 eos/hpf)

If yes, approve 300mg/2mL for 12 months by GPID or GPI-14 with a quantity limit of #8mL per 28 days.

If no, continue to #5.

- 5. Does the patient have a diagnosis of prurigo nodularis AND meet the following criterion?
  - The patient has had prurigo nodularis improvement (reduction) of pruritis or pruriginous lesions

If yes, approve for 12 months by GPID or GPI-14 with a quantity limit of #4mL per 28 days. If no, do not approve.

RENEWAL DENIAL TEXT: \*Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **DUPILUMAB** (**Dupixent**) requires the following rule(s) be met for renewal:

- A. You have ONE of the following diagnoses:
  - 1. Moderate to severe atopic dermatitis (a type of skin condition)
  - 2. Moderate to severe asthma
  - 3. Chronic rhinosinusitis with nasal polyposis (inflammation of nasal and sinus ways with small growths in the nose)
  - 4. Eosinophilic esophagitis (a type of immune system disorder)
  - 5. Prurigo nodularis (a type of skin condition)
- B. If you have moderate to severe atopic dermatitis, renewal also requires:
  - 1. You have shown improvement while on therapy
  - 2. You will NOT use Dupixent concurrently (at the same time) with other systemic biologics (such as Adbry [tralokinumab-ldrm]) or any JAK inhibitors (such as Rinvoq [upadacitinib], topical Opzelura [ruxolitinib], Cibinqo [abrocitinib]) for the treatment of atopic dermatitis

(Renewal denial text continued on next page)

Revised: 5/23/2023 Page 11 of 13

## **DUPILUMAB**

## RENEWAL CRITERIA (CONTINUED)

## C. If you have moderate to severe asthma, renewal also requires:

- 1. You will continue to use an inhaled corticosteroid (ICS) AND at least one other maintenance medication (e.g., long-acting inhaled beta2-agonist [such as salmeterol, formoterol, etc.], long-acting muscarinic antagonist [such as aclidinium bromide, ipratropium, tiotropium, umeclidinium, etc.], a leukotriene receptor antagonist [such as montelukast, zafirlukast, zileuton, etc.], theophylline)
- 2. You have shown a clinical response as evidenced by ONE of the following:
  - a. Reduction in asthma exacerbation (worsening of symptoms) from baseline
  - b. Decreased use of rescue medications
  - c. Increase in percent predicted FEV1 (amount of air you can forcefully exhale) from pretreatment baseline
  - d. Reduction in severity or frequency of asthma-related symptoms such as less wheezing, shortness of breath, coughing, etc.
- 3. You will NOT use Dupixent concurrently (at the same time) with Xolair (omalizumab) or an anti-IL5 biologic (such as Nucala [mepolizumab], Cinqair [reslizumab], Fasenra [benralizumab]) when these are used for the treatment of asthma

## D. If you have chronic rhinosinusitis with nasal polyposis, renewal also requires:

1. You have shown a clinical benefit compared to baseline (such as improvements in nasal congestion, sense of smell or size of polyps)

#### E. If you have eosinophilic esophagitis, renewal also requires:

1. You have shown improvement while on therapy (such as symptom improvement or achieving histological remission defined as peak esophageal intraepithelial eosinophil count of less than or equal to 6 eos/hpf [a type of test that evaluates disease status])

## F. If you have prurigo nodularis, renewal also requires:

1. You have had prurigo nodularis improvement or reduction of pruritis (itching) or pruriginous lesions (wounds)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.
