Your Rights and Protections Against Surprise Medical Bills

When you get emergency care or are treated by an out-of-network provider at an in-network hospital or ambulatory surgical center, you are protected from balance billing. In these cases, you shouldn't be charged more than your plan's copayments, coinsurance and/or deductible.

What is "balance billing" (sometimes called "surprise billing")?

When you see a doctor or other health care provider, you may owe certain <u>out-of-pocket costs</u>, like a <u>copayment</u>, <u>coinsurance</u>, or <u>deductible</u>. You may have additional costs or have to pay the entire bill if you see a provider or visit a health care facility that isn't in your health plan's network and/or your plan does not cover out-of-network services.

"Out-of-network" means providers and facilities that haven't signed a contract with your health plan to provide services. Out-of-network providers may be allowed to bill you for the difference between what your plan pays and the full amount charged for a service. This is alled "balance billing." This amount is likely more than your in-network costs for the same service and hight not count toward your plan's deductible or annual out-of-pocket limit. Your health plant overage may not cover out-of-network services when you agree (consent) to receive services from the out-of-network providers.

"Surprise billing" is an unexpected balance bill. This an hap en wood you can't control who is involved in your care—like when you have an emergency or when you schedule a visit at an in-network facility but are unexpectedly treated by an out-of-network provider. Surprise medical bills could cost thousands of dollars depending on the procedure of ervice. Providers and facilities are not balance billing you when they seek to collect constants or another amount that you agreed to pay or are required to pay under your plan for the services that they provided.

You're protected from balance by ling.

Emergency services

If you have an emerger by medical condition and get emergency services from an out-of-network provider or facility, the most they an bill you is your plan's in-network cost-sharing amount (such as copayments, coinsurance and deductibles). You **can't** be balance billed for these emergency services. This includes services you may get after you're in stable condition, unless you give written consent and give up your protections not to be balanced billed for these post-stabilization services.

In some circumstances, you may be protected from balance billing under Maryland state law. For example, if you are enrolled in a fully-insured plan and are treated by a Maryland doctor in an emergency room, the law may protect you.

Certain services at an in-network hospital or ambulatory surgical center

When you get services from an in-network hospital or ambulatory surgical center, certain providers there may be out-of-network. In these cases, the most those providers can bill you is your plan's in-network cost-sharing amount. This applies to emergency medicine, anesthesia, pathology, radiology, laboratory, neonatology, assistant surgeon, hospitalist, or intensivist services, or when an in-

network provider is not available. These providers **can't** balance bill you and may **not** ask you to give up your protections not to be balance billed.

If you get other types of services at these in-network facilities, out-of-network providers **can't** balance bill you, unless you give written consent and give up your protections.

You're <u>never</u> required to give up your protections from balance billing. You also aren't required to get out-of-network care. You can choose a provider or facility in your plan's network.

You are protected from balance billing under Maryland law given that most hospital services are subject to an All-Payor Model Agreement, which means that hospital bills are the same for all payers including consumers. Maryland law also provides protection from balance billing from out-of-network providers but the protection depends on whether you are enrolled in an HMO or PPO plan and, for PPO enrollees, whether the physician is on-call or hospital based.

When balance billing isn't allowed, you also have these protections:

- You're only responsible for paying your share of the cost (like the paymrats, coinsurance, and deductible that you would pay if the provider or facility was in-nethor. Your health plan will pay any additional costs to out-of-network providers and facilities directly.
- Generally, your health plan must:
 - O Cover emergency services with tree, ring you to get approval for services in advance (also known as "prior actic rizac n").
 - Cover emergency services v. 't-on network providers and facilities.
 - O Base what you ow in providing or facility (your cost-sharing) on what it would pay an in-network providing facility and show that amount in your explanation of benefits.
 - O Count an amount, bu pay for emergency services or non-emergency services provided by certain out-of-network providers at an in-network facility toward your in-network eductible and out-of-pocket limit.

If you think you've been wrongly billed by a provider or facility, contact the federal government at: 1-800-985-3059 or the Maryland Insurance Administration at https://insurance.maryland.gov/Consumer/Pages/FileAComplaint.aspx or call 1-800-492-6116.

For more information, see *When Illness or Injury is Caused by a Third Party* in this section.
