

# MEASURING CARE QUALITY IN OUR HOSPITALS

Kaiser Foundation Hospital, Northern California Region  
Roseville

**May 2017**

**Re: Kaiser Foundation Hospital – Roseville**

1600 Eureka Road  
Roseville, CA 95661

At Kaiser Permanente, we participate in a number of independent reports on quality of care so our members and the public have reliable information to understand the quality of care we deliver, as well as to compare our performance to that of other health care organizations. Results from these reports are summarized below, followed by a description of quality activities.

**From: The Joint Commission  
Accreditation Status / Gold Seal of Approval™**

Hospitals that choose to be evaluated by The Joint Commission are demonstrating their commitment to providing the highest level of quality care to their patients. The Joint Commission's standards are regarded as the most rigorous in the industry, and their Gold Seal of Approval requires compliance with state-of-the-art standards for quality, safety of care, and other accreditation requirements. Kaiser Foundation Hospital (KFH) – Roseville has earned The Joint Commission's Gold Seal of Approval™.

The organization was last accredited on July 12, 2014, and received Advanced Certification in Stroke (Primary Stroke Center) from The Joint Commission effective February 5, 2016.

Roseville's Quality Report from The Joint Commission is available at:

<https://www.qualitycheck.org/quality-report/?bsnId=513387>

## From: The Leapfrog Hospital Quality and Safety Survey

The Leapfrog Group is a coalition of business, health care, and public organizations working to initiate breakthroughs or "leaps" in the safety and quality of health care in the United States. Leapfrog sponsors an annual survey to gather information from health care providers (including Kaiser Permanente) and to inform the public about aspects of medical care in hospitals. The following represents scores on the Leapfrog survey, submitted **October 2016**.

### Kaiser Foundation Hospital – Roseville

Inpatient Care Management					Medication Safety		Maternity Care				
Steps to Avoid Harm	Managing Serious Errors	Appropriate Antibiotic Use in Hospitals	ICU MD Training	Readmissions for Common Acute	Computer Ordered Medication	Safe Medication Administration	Early Elective Deliveries	Caesarean Sections	Episiotomies	Maternity Care Processes	High Risk Deliveries
★★★★★	★★★★★	★★★★★	★★★★★	★★	★★★★★	★★★★	★★★★★	★★★★★	★★★★★	★★★★★	★★★★

High Risk Surgery Care				Infections					Injuries	
Aortic Valve Replacements	Abdominal Aortic Aneurysm Repairs	Pancreatic Resections	Esophageal Resections	Central Line Infections in ICU	Urinary Catheter Infections in ICU	MRSA	C. difficile Following Surgery	Surgical Site after Colon Surgery	Hospital-Acquired Ulcers	Hospital-Acquired Injuries
DNA	★★★★★	DNA	★★★★	★★★★	★★	★★★★★	★★★★	★★	★★	★★★★★

The Leapfrog Group's website offers hospital comparison searches: <http://www.leapfroggroup.org/cp>. The data is updated annually or more frequently from interim reports provided by the hospital. The site contains additional explanation and data on each measure, reached by clicking on the "i" symbol.

Components of the **Patient Safety** scores containing additional data are explained in detail on Leapfrog's website: <http://www.hospitalsafetyscore.org/>

Kaiser Permanente Key	Progress Toward Meeting Leapfrog Standards	Leapfrog's Website Key
★★★★★	Fully meets standards.	
★★★★	Substantial progress.	
★★★	Some progress.	
★	Willing to report.	
DNA	This measure is not applicable to this hospital	DNA
UCS	Sample size too small to calculate score.	

## Measure Definitions

- **Steps to Avoid Harm** – Hospital-wide protocols and procedures are key to keeping patients safe from harm.
- **Managing Serious Errors** – Hospitals must be accountable for serious reportable events.
- **Appropriate Antibiotic Use in Hospitals** – Using antibiotics responsibly helps prevent the spread of antibiotic-resistant bacteria.
- **ICU Staffing** – Intensivists in hospital ICUs better manage and coordinate care.
- **Readmissions** – Patients should be discharged with a plan for home health and follow-up care to ensure they are not readmitted.
- **Doctor Ordered Medication with Computers** – Electronic prescribing system alert staff to potentially serious medication errors.
- **Safe Medication Administration** – Special bar coding technology can significantly prevent medication errors.
- **High Risk Treatments** – Hospitals with high volumes of specific high risk procedures, surgeries, or conditions, which often result in the best outcomes – a process known as evidence-based hospital referral.

# MEASURING SERVICE QUALITY IN OUR HOSPITALS

Kaiser Foundation Hospital, Northern California Region  
Roseville

## From: Consumer Assessment of Healthcare Providers and Systems Hospital Survey (Hospital CAHPS®) as reported by the Centers for Medicare & Medicaid Services (CMS)

The CAHPS Hospital Survey (HCAHPS) is the first national publicly reported standardized survey and data collection methodology for measuring all patients' perspectives of their hospital care. CMS posts quarterly updates on HHS' website. Collection and reporting of data are voluntary.

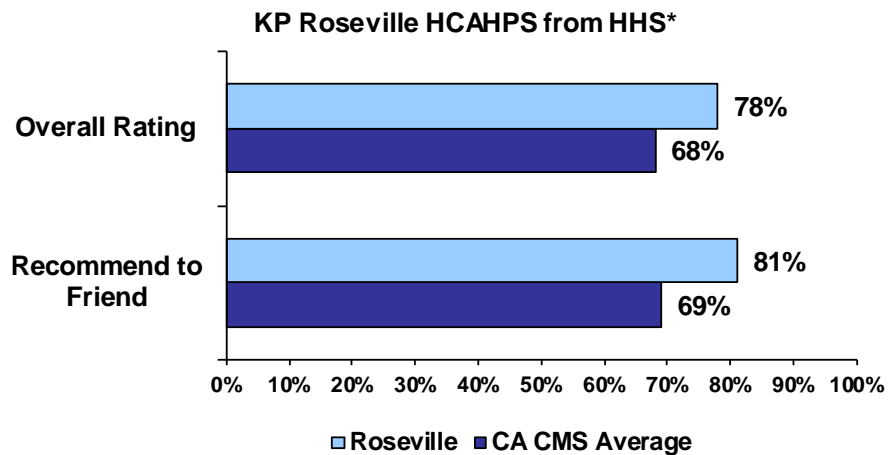

The results below are from patients discharged between **July 2015 and June 2016**. Scores reflect the percentage of patients who answered **"always"** (not "usually", "sometimes", or "never") to six composites and two individual "environment" questions and **"yes"** to the seventh "discharge information" composite. The questions are described on the following page. Benchmark comparison numbers are determined by CMS and are based on all hospitals participating in California.

**KP Roseville HCAHPS from HHS\***

\*CMS posts results at <http://www.hospitalcompare.hhs.gov> and as a link on <http://www.medicare.gov>.

Scores on the “overall rating” question below are based on a 0-10 scale, worst to best, and represent answers of **9 and 10**. Scores on the “recommend to friend” question are based on a 1-4 scale, ranging from “definitely no” to “definitely yes,” and reflect answers of “**definitely yes.**” Again, benchmark comparison numbers are determined by CMS and are based on all hospitals participating in California.

**HCAHPS Summary Star Rating: \*\*\*.** HCAHPS summary star ratings provide a snapshot of the 11 measures of patient experience of care on Hospital Compare in a single, comprehensive metric. <http://www.medicare.gov/hospitalcompare/About/HCAHPS-Star-Ratings.html>

### Descriptions of Questions

The seven composites are composed of the following questions:

- **MD Communication** results are a composite of three questions asking how often doctors treated you with courtesy and respect, carefully listened to you, and explained things in a way you could understand.
- **Nurse Communication** results are a composite of three questions asking how often nurses treated you with courtesy and respect, carefully listened to you, and explained things in a way you could understand.
- **Staff Responsiveness** results are a composite of two questions asking how often you got help as soon as you needed it from nurses or other hospital staff in getting to the bathroom or using a bedpan and after pressing the call button.
- **Pain Management** results are a composite of two questions asking how often your pain was well controlled and if the staff did everything they could help with your pain.
- **Medicines Explained** results are a composite of two questions asking how often staff told you what a new medicine was for before giving it to you and how often the staff described possible side effects in a way you could understand.
- **Discharge Information** results are a composite of two questions asking if doctors, nurses, or other hospital staff talked with you about whether you would have the help you needed when you left the hospital.
- **Care Transition** results are a composite of three questions asking about your understanding of your after-care for when you leave the hospital.

Two individual questions on hospital environment:

- How often were your room and bathroom kept **clean**?
- How often was the area around your room **quiet** at night?

And two questions relating to overall evaluation:

- How do you rate the hospital **overall**?
- Would you **recommend** the hospital to a friend?

# QUALITY IN OUR HOSPITALS

## Kaiser Foundation Hospital, Northern California Region Roseville

Kaiser Foundation Hospital (KFH) Roseville is a licensed, 340-bed facility that serves approximately 299,963 members. The medical center includes medical offices in Folsom, Roseville, and Lincoln.

At KFH Roseville, we are proud to deliver high-quality health care to the communities we serve. At our request, The Joint Commission surveys our hospital every three years to evaluate the health care services we provide. The survey is one of the industry's most thorough evaluations for quality and safety of care. We are proud to be fully accredited by The Joint Commission and to have received The Joint Commission's Gold Seal of Approval®. We are also accredited by The Joint Commission as a Disease-Specific Stroke Center and received the Get With The Guidelines®-Stroke Gold Plus recognition and Target Honor Roll Elite award for 2015 and 2016. In 2013, the Commission on Cancer of the American College of Surgeons granted three-year accreditation with commendation to the cancer program in Roseville Medical Center with designation of Comprehensive Community Cancer Program.

We follow The Joint Commission's National Quality Improvement Goals for heart attack care, heart failure care, surgical care improvement, pneumonia care, venous thromboembolism, global measure pneumococcal and influenza immunization, stroke, perinatal care, and tobacco use and treatment core measures. KFH Roseville has participated in The Joint Commission Collaborative to Reduce Sepsis Mortality and to Reduce Clostridium Difficile Infection.

In addition to high-quality health care, patient safety is of utmost concern at KFH Roseville. We believe that everyone working at Kaiser Permanente is responsible for ensuring our patients' safety, and we encourage our physicians, nurses, pharmacists, and employees to do everything possible to help keep patients safe. Kaiser Permanente has a long history of emphasizing patient safety, and we continually develop, test, and implement new programs that help ensure patient safety, including medication safety, infection prevention, and reduction of surgical complications.

KFH Roseville follows all of The Joint Commission's National Patient Safety Goals, and we are an active partner in the Institute for Healthcare Improvement's 5 Million Lives Campaign, another national patient safety effort. KFH Roseville has made good progress in implementing The Leapfrog Group's safe practices, determined by the National Quality Forum to prevent medical mistakes. In 2015, The Leapfrog Group awarded the prestigious Top Hospital designation to KFH Roseville. The award was given to just 62 urban hospitals nationwide from The Leapfrog Group. In spring 2016, KFH Roseville also received an "A" ranking for Leapfrog Safety Scores. The Hospital Safety Score is a letter grade rating of how well hospitals protect patients from accidents, injuries, and errors.

In 2015, our Women's and Children's Services was named one of "America's 100 Best Hospitals for Obstetrics" and one of "America's 100 Best Hospitals for Patient Experience" by Women's Choice Award®. In addition, we were accepted into the Children's Hospital Association. KFH Roseville also is a designated California Children's Services (CCS) Tertiary Hospital, which requires the hospital to maintain compliance with CCS Tertiary Hospital Standards and recognizes the hospital for comprehensive, family-centered, coordinated care and follow-up.

We look forward to serving you in all your health care needs.
