

What I Love - Southern California
:30s - Member (Alejandra)

Alejandra R.: After I switched to Kaiser Permanente, the first thing I noticed was a convenience and efficiency.

I'd never experienced anything like that.

It makes a huge difference.

When I was diagnosed with cancer, the doctors really put me at ease.

I could be open about what I was feeling both physically and mentally.

And the care team is always communicating with each other, which makes me feel safe and secure.

I know Kaiser Permanente has my back and cares about me as a whole person.

Voice-over: Kaiser Permanente.
