

KP CEA

My name is Amy Baca-Oehlert. I am the president of the Colorado Education Association. The Colorado Education Association represents over 39,000 educators across the state of Colorado.

I am proud to serve as the president of the Colorado Education Association, ensuring that our educators have great quality working conditions and that our students have great quality public schools to attend.

Kaiser Permanente has been a great partner to our schools, to our districts in not only providing access to care for employees, but for being a partner in hosting community events and events at the schools.

So, I've been a member of Kaiser Permanente for 25 years. As my life has evolved, so have my experiences with Kaiser Permanente. What I love about Kaiser Permanente is that I have a convenient place to go to get my medical needs met, my family's medical needs met, and that it is a place that provides not just medical care, but care for you as a person.

The convenience that Kaiser Permanente offers is so beneficial to educators because our lives are so scheduled. The ability to have your doctor's appointment in the same facility, go and get labs, go to the pharmacy if you need a prescription is such a benefit.

I think having options via Kaiser Permanente: virtual options, telehealth has been so beneficial to our educators.

I have to say that one of the things that I use the most and I hear many of our educators say the same thing is the Kaiser Permanente app.

It is such a one stop shop to get all of your needs met. My personal experience with changing providers within Kaiser Permanente has been nothing but one of ease. I didn't have to contact a bunch of people to switch my medical records and to give my medical history. It all just transferred up.

As a working mom, someone who leads a very busy life. The convenience of access to Kaiser Permanente has been something that has been tremendous. And so if someone were asking me about joining Kaiser Permanente, I would say absolutely.
