

Kaiser Permanente New Beginnings

Kaiser Permanente is entering a new season in Colorado.

We're making bold moves to bring our unique model of integrated health care and coverage to more Coloradans.

Kaiser Permanente is one of the state's largest nonprofit health care organizations.

We offer one connected experience where a health plan, doctors, and care teams work together to deliver highly coordinated care and better outcomes.

Our members have asked for more choice, convenience, and access to our high-quality care — and we've listened.

NEW MEDICAL OFFICES

Over the next few years, four new Kaiser Permanente medical offices will open in Parker, Pueblo, Lakewood, and Westminster.

These bigger and better facilities feature modern design touches with more space and advanced technology.

Members can access services like primary care, labs, pharmacy, and more, under one roof, and sometimes, in one visit.

And through our Westminster Medical Offices construction, we're building a brand-new ambulatory surgery center for outpatient procedures.

MORE URGENT CARE FACILITIES

Sometimes care can't wait. We're adding more urgent care facilities up and down the Front Range so that members can access the care they need, when they need it.

This includes a new urgent care at our Westminster Medical Offices, a small urgent care at our Rock Creek Medical Offices, and more CommonSpirit Health urgent care locations.

A BROADER HOSPITAL NETWORK

We're bringing care closer to where our members live and work by deepening our relationships with Colorado's leading hospitals and two of the state's largest health systems, CommonSpirit Health and HCA HealthONE.

Kaiser Permanente doctors are now caring for members at these award-winning facilities, where they share clinical protocols with care teams and seamlessly coordinate care — from the labor and delivery unit or operating room back to our medical offices.

Seven metro Denver hospitals have joined Kaiser Permanente's hospital network since 2024.

Our hospital network now spans more than thirty facilities across Colorado — from Boulder to Pueblo to Fort Collins.

INCREASING ACCESS TO PRIMARY CARE

Primary care is at the heart of what we do at Kaiser Permanente.

That's why we're making significant investments to hire more doctors and support staff, optimize schedules, and improve workflows to make it easier for members to schedule appointments with primary care providers.

And because health happens everywhere, our members also have lots of ways to get virtual care 24/7 by phone, video, or email.

With a visionary model that puts people before anything else, Kaiser Permanente is radically advancing health.

We're proud to have cared for the people of Colorado for more than fifty years.

Our journey continues with fresh excitement as we grow and strengthen the Kaiser Permanente care experience for current and future generations.
