Sonja B.: Several years ago I was hit head on by a drunk driver.

All in all, it was about a year recovery.

I couldn't have done it without Kaiser Permanente.

My doctors answered all of my questions,

And the care I received focused on my body and my well-being.

I really trusted my care team.

I was a person to them.

And to me, that trust meant I would get better.

Voice-over: Kaiser Permanente.
