

Transcript of video: Dental Benefit Information

Thank you for being a Kaiser Permanente Medicare Health Plan member.

Did you know?

As part of your annual Medicare health plan, you may also have convenient access to affordable dental coverage. At Kaiser Permanente, we believe dental health is part of total health, and total health is the essence of our care model. That's why we offer basic preventive services as part of our standard dental coverage.

Our dental coverage plan always includes: oral exams, dental cleanings, and may include: fillings, extractions, and crowns.

If you are already enrolled in an Advantage Plus plan, you will receive more comprehensive dental benefits.

Our comprehensive coverage plan may include: fillings and crowns, oral surgery, periodontic procedures, and dentures.

If you have dental coverage, your provider will be dependent on where you live. Your provider may be Delta Dental, Liberty Dental or KP Administered Dental Services. Note: In Hawaii, Delta Dental is known as Hawaii Dental Services.

To find out if you have dental coverage and to learn more, visit kp.org/dental-getstarted.

On this website, look for the "How do I use my dental benefits?" section. You'll see a list of websites and phone numbers organized by state. Visit your state's website or call the appropriate number. The next step is to choose your preferred dental professional so you can begin using your benefits. Call your provider to get started. You can also find the provider directory on your provider's website.

Make sure you discuss your plan details and costs before going to your first appointment. You can always connect with your dental provider by calling them directly or visiting their website. Now that you know more about getting started, you're invited to visit kp.org/dental-getstarted to contact your dental provider and start learning about your dental benefits.

Thank you for being a valued member of Kaiser Permanente.
