

Lauren Shockey, Kaiser Permanente Colorado member

Both of my boys are Kaiser Permanente babies, and my birthing experience was so positive both times. When my son was a toddler, his health and personality seemed off, and then he very suddenly dropped weight. We wanted a diagnosis quickly. We had a pediatrician appointment, ultrasound, and blood work all in the same building. And that's what I love about Kaiser Permanente is it's so convenient for families. Once our son was diagnosed with celiac, Kaiser Permanente had a plan for us.
