Kaiser Permanente New Beginnings

Kaiser Permanente, one of the state's largest nonprofit health care organizations, is making bold moves to bring our unique model of integrated health care and coverage to more Coloradans.

We offer one connected experience where a health plan, doctors, and care teams work together to deliver highly coordinated care and improved health outcomes.

Our members have asked for more choice, convenience, and access to our high-quality care — and we've listened.

NEW MEDICAL OFFICES

We're opening bigger and better medical offices that feature modern design touches with more space and advanced technology.

New Kaiser Permanente medical offices in Lakewood, Parker, and Pueblo are now open.

Construction is underway on the brand-new Westminster Medical Offices, which will feature expanded services and an outpatient surgery center.

Members can access services like primary care, labs, pharmacy, and more, all under one roof in these facilities.

A BROADER HOSPITAL NETWORK

Our hospital network now spans more than thirty facilities across Colorado — from Boulder to Pueblo to Fort Collins and Greeley.

Through this expanded hospital network, Kaiser Permanente doctors are caring for patients at several of metro Denver's leading hospitals.

At these Kaiser Permanente-designated hospitals, care stays connected.

Members receive care from Kaiser Permanente medical and surgical teams that have access to their health history through our electronic health record.

These teams collaborate across specialties to deliver seamless hospital care that achieves the highest levels of quality and safety.

They also support a smooth transition back to home and ongoing care at our medical offices.

MORE URGENT CARE FACILITIES

Sometimes care can't wait. In an emergency, members should call 911 or go to the nearest emergency room.

We’re also adding more urgent care locations up and down the Front Range so that members can access the care they need, when they need it.

This includes a new urgent care at our Westminster Medical Offices, an urgent care department at our Rock Creek Medical Offices, and other affiliated urgent care options.

INCREASING ACCESS TO PRIMARY CARE

Primary care is at the heart of what we do at Kaiser Permanente.

That’s why we’re hiring more doctors and support staff, optimizing schedules, and improving workflows to make it easier for members to schedule appointments with primary care physicians.

We’re also continuing to grow our affiliated provider network and give members more ways to get care, with virtual care available by phone, video, and online chat.

Kaiser Permanente has proudly cared for the people of Colorado for nearly 60 years.

Our journey to care for future generations is just getting started!
