

Kaiser Permanente New Salinas Medical Office Building Welcome

Kaiser Permanente is proud to be part of the Monterey County community. Our new state-of-the-art medical offices, conveniently located just off Highway 101 in the Boronda Crossing Shopping Center, provide members with access to high quality primary care, specialty services, as well as pharmacy, lab, and imaging.

Adult and family medicine doctors, obstetricians and gynecologists, pediatricians, and mental health providers are all available and ready to help take care of your health needs. Same-day and next-day appointments are available.

In addition to in-person routine and primary care appointments, we offer our 24-hour care and advice line. Many services are available through phone and video appointments, providing you with alternative, convenient care options.

To provide local access to labor and delivery, inpatient and other hospital services, we've partnered with Watsonville Community Hospital, an award-winning public non-profit community health care provider.

Like at some of our other affiliate hospitals, Kaiser Permanente physicians will coordinate your care. You can also receive care at any of our hospitals located nearby in San Jose and Santa Clara, or any other Kaiser Permanente hospital that's convenient for you.

You'll find that most of our doctors and care team are your neighbors. They live here and they care about this community. Thank you for taking the time to tour our new Salinas Medical Offices, offering expanded services, allowing greater access to care for our members throughout the community.
