

## Vide transcript of Pueblo Medical Offices ground breaking event

Anytime you see a construction happening in the city of Pueblo, you really get excited for what the future is for this city.

So we are here for the official groundbreaking of our new Kaiser Permanente and Pueblo N Medical offices, and we are super excited about that.

Yeah, I've got some applause for that.

You know, there's a lot of a lot of healthcare needs that need to be filled in this community and having Kaiser coming in to do that, I mean, it's a huge benefit to our community.

We opened our existing offices here in lease space in 2009 and at that point about 800 patients called the Pueblo N Medical Office's home.

And today we are very proud that we get to take care of more than 5400 members who come to this office on a regular basis.

And with this new facility, which will just be phenomenal, we hope to grow that even more every year.

Kaiser Permanente buildings are really meant with our patient at the center primarily, and also our teams.

So we are about preventative care and keeping people healthy and well.

And that's both physically and mentally.

And we know that people get injured and they get sick, so we want to be able to heal them.

And everything that the building is designed around is to promote that, both for the patients and the members, but also our teams that are taking care of that patient and member.

Now it is my pleasure to transition to what we've all been waiting for, our groundbreaking and 321.

We are so proud that so many people in this part of Pueblo trust us with their lives and their medical care.

It is really, really important to us.
