Hydroxychloroquine (Plaquenil) requires a clinical review. Appropriateness of therapy will be based on the following criteria:

- Prescriber is a Rheumatologist, Dermatologist, or Nephrologist

  - OR -

- Patient is hospitalized or residing in long-term care facility, COVID-19 positive, and not able to receive remdesivir (an investigational COVID-19 therapy)

  - OR -

- Patient is currently stable on the drug and rheumatology, dermatology, or nephrology has determined that continued use is appropriate
