Your Prescription Drug Benefit and Formulary

As part of your comprehensive HealthSpan health care plan, you may have a prescription drug benefit. This brochure will help you understand the HealthSpan HMO Drug Formulary, how your prescription drug coverage works, and how to get your prescriptions filled so you can get the most out of this benefit. For the most current version of the HealthSpan HMO Drug Formulary call our Customer Relations Department: (216) 621-7100 or 1-800-686-7100 TTY: (216) 635-4444 or 1-877-676-6677 Monday-Thursday, 8:15 a.m. to 5:00 p.m. Friday, 9:00 a.m. to 5:00 p.m.

What is my prescription drug coverage?

Coverage can vary from plan to plan, and not all HealthSpan health plans include prescription drug coverage. Additionally, some prescription drug coverage may exclude certain drugs, cover generic drugs only, or limit the amount of the drug you can get with a prescription or copayment. The best way to determine your prescription drug coverage is to consult your *Evidence of Coverage* or call our Customer Relations Department.

What is the HealthSpan HMO Drug Formulary?

The HealthSpan HMO Drug Formulary is a list of drugs that are covered under your prescription drug benefit. HealthSpan doctors and other clinicians use the formulary to help them determine the safest, most effective drugs to prescribe for you.

HealthSpan uses a “closed” formulary, which means that only those medications included in the formulary are covered under the prescription drug benefit. Using formulary medications helps HealthSpan maintain high quality care for you and your family and keep prescription coverage affordable.

How are drugs selected for the formulary?

Medications in the HealthSpan HMO Drug Formulary are chosen by a group of HealthSpan physicians, pharmacists, and nurses known as the Pharmacy and Therapeutics Committee. This committee meets regularly to evaluate and select the safest, most effective medications for our members. Frequently, more than one drug will work equally well for a medical condition. In those cases, we consider other factors, such as cost, to choose medications that provide the best value.

What drugs are included in the formulary?

Please see the list of formulary drugs beginning on page 13. Coverage of certain formulary medications may be subject to restrictions established by the Pharmacy and Therapeutics Committee. Some medications require special procedures for obtaining or dispensing the medication due to safety or other concerns. The specific drug and allowable quantity is determined by the Pharmacy and Therapeutics Committee (as described on page 4) and may be dispensed only through the HealthSpan Advanced Care Pharmacy.

Does the formulary ever change?

The Pharmacy and Therapeutics Committee reviews and updates our formulary regularly throughout the year and notifies our doctors, pharmacists, and other clinicians about any changes. If a change in the formulary affects any of your prescriptions, your doctor or pharmacist will let you know. For the most current version of the HealthSpan Drug Formulary, please call our Customer Relations Department.

What if my doctor prescribes a nonformulary drug?

If your doctor prescribes a nonformulary drug, your pharmacist may call your doctor to suggest an alternative formulary medication. Your doctor may then either change the prescription to a formulary medication or submit a *Request for Drug Coverage* form to HealthSpan to request coverage of the nonformulary drug. If your plan covers nonformulary drugs, simply pay the nonformulary copayment, the *Request for Drug Coverage* is not applicable for your plan. Please refer to your Evidence of Coverage to determine if your plan covers nonformulary drugs.

Request for Drug Coverage

Nonformulary drugs will be covered for an individual in the same manner as formulary drugs if you meet certain criteria and a prior authorization is granted. Criteria can be defined by guidelines, if you are experiencing adverse reactions, and if the therapy proves to be ineffective. Criteria is approved by the Pharmacy and Therapeutics Committee.

Prescriptions for nonformulary medications can be filled at HealthSpan pharmacies, but it could take longer to receive your prescription if the pharmacy has to place a special order. Please keep in mind that you will be responsible for the full retail cost

6 Prescription Drug Benefit

unless your doctor has obtained approval for the nonformulary medication through the *Request for Drug Coverage* or your plan covers nonformulary drugs.

What are “brand-name” and “generic” drugs?

The HealthSpan Drug Formulary includes brand-name and generic drugs.

- ◆ **Brand-name** drugs are drugs that are produced and sold under the original manufacturer’s brand name.
- ◆ **Generic** drugs are produced and sold under their chemical names after the patent of the brand-name drug expires.

Although the price is lower, **the quality and effectiveness of generic drugs is the same as brand-name drugs.** The Food and Drug Administration requires that a generic drug contain the same active drug ingredient in the same amount as the brand-name drug. However, a generic drug may differ in certain other ways, such as color, flavor, shape, or inactive ingredients. HealthSpan pharmacies stock only generic drugs that have met the high standards of both the Food and Drug Administration (FDA) and the experts in our comprehensive quality assurance program.

Some brand-name drugs have a generic equivalent and others do not. When both a brand-name and a generic equivalent are available, usually only the generic equivalent is included in the HealthSpan HMO Drug Formulary. When a generic equivalent is not available, the formulary will include the brand-name version.

Where can I have my prescriptions filled?

You can have prescriptions filled at HealthSpan pharmacies located in our medical offices and at affiliated pharmacies in our service area, or you may use the HealthSpan Direct Mail Pharmacy. Pharmacy locations are listed in your *Member Handbook*, in the *Provider Directory* included in your enrollment packet, or in your *Evidence of Coverage*. Please remember to bring your HealthSpan member ID card with you when you pick up your prescriptions.

How do I order prescription refills?

You can order most prescription refills from HealthSpan pharmacies in four different ways:

- Log on to **healthspan.org/myhealthmanager** and order online, 24 hours a day, 7 days a week.¹
- Call the 24-hour Prescription Refill Line printed on your prescription label.
- Call the Direct Mail Pharmacy at 1-877-676-6280 (hearing and speech impaired may call Customer Relations at 1-877-676-6677 (TTY); Monday – Thursday, 8:15 a.m. – 5 p.m. and Friday, 9:00 a.m. – 5 p.m. for clarification on how to use the Direct Mail Pharmacy). Prescriptions will be mailed at no extra cost to you. Please allow 10 business days to receive your order.
- Mail your refill request in a postage-paid mail order envelope available at any HealthSpan pharmacy.

Our HealthSpan pharmacies also offer you favorable pricing on selected over-the-counter products that do not require a prescription. Your HealthSpan pharmacist will be happy to assist you in selecting products to meet your health care needs.

How much medication does my copayment cover?

You may receive up to a 31-day supply of medication for a single copayment. You will be charged an additional copayment for each additional 31-day supply of medication, up to a maximum of a three-month supply. Some medications may have quantity restrictions limiting the amount of the drug you can get per prescription or copayment.

Depending on your prescription benefit, you may also be able to obtain up to a 62-day or 93-day supply of maintenance medications (certain restrictions apply) for chronic medical conditions for a single copayment. All you have to do to receive this cost savings is ask your physician to prescribe a two-month or three-month supply of the medication and fill your prescription through the Direct Mail Pharmacy.

¹Members who need to begin taking medications immediately will need to have their prescription filled at a HealthSpan Medical Office Pharmacy and normal copayments will apply. Class II controlled substances, medications that require refrigeration, and certain types of insulin are not available through the Direct Mail Pharmacy. These savings are only available for HealthSpan members who have a prescription drug order benefit.

For a certain period of time, information and resources for HealthSpan will still be located on the Kaiser Permanente website kp.org, including the services available through My Health Manager. Some content and documents may reference the Kaiser Permanente brand name, but please note that in Ohio, this content now applies to HealthSpan Integrated Care.

8 Prescription Drug Benefit

By law, the pharmacy may not dispense more than the quantity of medication written on the prescription, regardless of any refills indicated. For example, if a prescription is written for 30 tablets with 12 refills, the pharmacy may dispense no more than 30 tablets at a time without contacting the doctor for authorization.

What drugs are not covered by my prescription drug benefit?

The following drugs are not covered by your HealthSpan prescription benefit. Please refer to your HealthSpan *Evidence of Coverage* for complete plan coverage, limitations, and exclusions specific to your prescription drug benefit.

- Drugs prescribed for cosmetic purposes.
- Drugs that are necessary for or related to an excluded service.
- Drugs used for the purpose of weight loss.
- Drugs and materials that require administration by medical personnel or observation by medical personnel during or after administration (these may be covered under your medical benefit).
- Nonprescription drugs and medications.
- Investigational or experimental drugs or drugs that are limited to investigational use.
- Replacement of lost or damaged prescriptions.
- Unless an exception is approved by Health Plan, drugs not approved by the FDA and in general use as of March 1 of the year immediately preceding the year in which the health plan coverage became effective or was last renewed.
- Nonformulary drugs at the request of the member, when a Plan Physician believes that the formulary alternative is effective. (Unless you have a nonformulary drug benefit.)
- Drugs used to enhance athletic performance.
- Medical supplies such as dressings and antiseptics (these may be covered under a supplemental durable medical equipment (DME) benefit).
- Vitamins and nutritional supplements that can be purchased without a prescription.

- Special medication packaging, other than Health Plan standard packaging, unless required by law.
- Drugs used to shorten the duration of the common cold.

Drugs prescribed for the treatment of involuntary infertility, sexual dysfunction, or contraception may or may not be covered, depending on your drug benefit. Consult your *Evidence of Coverage* or call our Customer Relations Department for more information.

HealthSpan HMO Formulary

Prescription Drug List | 2014

This section lists the medications included in the HealthSpan HMO Drug Formulary.

Please remember:

- The formulary is revised periodically and the drugs on this list are subject to change without notice. For the most current version, please call our Customer Relations Department.
- The inclusion of a drug in the Formulary does not mean that all strengths or dosage forms are covered or that your physician will prescribe that drug for your condition.
- Coverage limitations may apply. Please refer to your HealthSpan *Evidence of Coverage* for complete plan coverage, limitations, and exclusions specific to your prescription drug benefit.

Brand names are listed in the HealthSpan HMO Drug Formulary only to help you identify a formulary drug and do not indicate that a particular brand-name version of a drug is covered. Brand names are capitalized (e.g., Amoxil) and generic names are in lower case (e.g., amoxicillin).
